

BUI THE TRUNG

Duong Quang Ham, Quan Hoa, Cau Giay, Hanoi, Vietnam

(+84) 373 104 304

trune.naee@gmail.com

<https://github.com/Trungnef>

BACKGROUND

Driven and innovative AI Engineer with a strong foundation in computer science and engineering principles. Passionate about deploying artificial intelligence to solve complex problems and improve efficiencies. Proficient in both theoretical AI concepts and practical implementations, thriving in dynamic environments where advanced technology solves real-world challenges.

EDUCATION

❖ **Vietnam Japan University (VJU) – Vietnam National University, Hanoi** 2021 - 2025

Bachelor of Computer Science and Engineering

- **GPA:** 3.61/4

- **Relevant Coursework:**

+ *Algorithms for Data Science.*

+ *Natural Language Processing.*

+ *Machine Learning, Deep Learning.*

+ *Statistical Methods for Data Analysis.*

WORK EXPERIENCE

❖ **Aimesoft Company, Hanoi - AI Engineer** December 2025 - Present

NTTEA – Japanese Administrative Text Generation

- Built data preparation and fine-tuning workflows for Japanese administrative writing based on approximately 120 official rules.
- Fine-tuned Tsuzumi-28B to generate compliant administrative documents from bullet-point inputs and rewrite informal text into formal administrative style.
- Supported model evaluation using MT-Bench and JGLUE.

Rakuyaku - QC Check / Consistency Check Tool

- Built AI backend services for document consistency checking across one or more PDF files.
- Applied RAG to enable semantic retrieval and automated question answering over complex PDF documents.
- Designed backend logic supporting consistency verification workflows for document quality control

RAG (QA Assist)

- Developed a RAG-based QA assistant service that manages documents, chat history, and conversational context for grounded question answering.
- Implemented context orchestration for a generative AI API-based system and improved retrieval flow for more relevant responses.

AimeDoc - Proposal Generation System

- Contributed to an internal product that generates PowerPoint proposal decks from requirement documents, specifications, and reference materials.
- Supported document ingestion, content structuring, and generation workflows to reduce manual proposal drafting effort.

Linebot Meisei - LINE Mini App Ordering Bot

- Developed backend and product features for a LINE-based ordering bot integrated with a mini-app workflow.
- Contributed to conversational flow design, order handling logic, and AI-assisted user interaction for product ordering

❖ DataCom Corp, Japan - AI Engineer

March 2025 - May 2025

Retail Manufacturer Matching Platform

- Led the development of an AI-powered platform designed to enhance connectivity among manufacturers, brands, and retailers in the Consumer-Packaged Goods (CPG) industry.
- Utilized advanced machine learning algorithms to facilitate real-time data analysis and insights, improving supply chain efficiencies and market response times.
- Implemented predictive analytics features that help stakeholders anticipate market trends and make data-informed decisions, driving profitability and strategic growth.

RESEARCH EXPERIENCE

❖ Research on the Chain of Thought technique in Large language models (Vietnam Japan University) - Hanoi

February 2025 - June 2025

Student Research

- Conducted a comparative study on the effectiveness of different prompt strategies including zero-shot, few-shot, Chain of Thought (CoT), self-consistency, and ReAct using large local language models such as LLaMA, Qwen, and Gemini.
- Implemented evaluation metrics like accuracy and inference assessments using the Groq platform to analyze the models' performance in solving traditional Vietnamese problems.
- Demonstrated how different prompting techniques influence the problem-solving capabilities of AI models, enhancing their practical applications in understanding and generating contextually relevant solutions for complex linguistic tasks.

❖ Training a high-performance Vietnamese language model based on the Mamba-2-hybrid architecture (Vietnam Japan University) - Hanoi

July 2024 - November 2024

Student Research

- Developed a high-performance Vietnamese language model using the Mamba-Hybrid architecture.
- Enhanced the model's functionality with a pre-trained Falcon Mamba 7B, expanding its vocabulary and syntactic understanding specifically for Vietnamese.
- Evaluated the model's performance, demonstrating its superior ability in handling long-context data efficiently with state-of-the-art accuracy.
- Presented the research findings at various academic and professional forums, showcasing significant advancements in NLP applications for Vietnamese.

PUBLICATIONS

❖ Bridging the Reasoning Gap in Vietnamese with Small Language Models via Test-Time Scaling - STDJ

2026

Authors: Bui The Trung, Do Minh Duc, Nguyen Van Vinh, Bui Nguyen Quoc Trinh

- Studied reasoning limitations of Vietnamese Small Language Models and applied test-time scaling techniques.
- Built Vi-S1K (training) and Vi-Elementary-Bench (evaluation) for Vietnamese mathematical reasoning.
- Showed that Supervised Fine-Tuning improves explanation quality by 77% on a 1.7B-parameter model.
- Analyzed CoT, Self-Consistency, and ReAct prompting, highlighting efficiency trade-offs for small models.

EXTRACURRICULAR ACTIVITIES

❖ 10th Youth Global Leadership Program, Seoul, Korea

November 2024 - December 2024

Participants

- Participated in the 10th Youth Global Leadership Program held in Seoul, Korea, engaging with global leaders and youth from diverse backgrounds to discuss contemporary leadership challenges and solutions.
- Enhanced skills in cross-cultural communication and leadership, contributing to various group projects and workshops focused on global issues.cing awareness and understanding among peers.

- ❖ **Certificate of Commendation, Youth Union of National University of Vietnam, Vietnam Japan University**

August 2024 - September 2024

Honoree

Commended for leadership and significant contribution to community service during the "Green Summer" volunteer campaign, involved in educational and infrastructural development in rural Vietnam.
- ❖ **Encouragement Award in the Contest on Marxism - Leninism, Ho Chi Minh Thought, and History of the Communist Party of Vietnam “Path of Light” VII, 2024**

April 2024

Award Recipient

Recognized for outstanding analytical abilities in political theory and history, contributed to academic discussions on Marxist-Leninist philosophy and its application to modern governance.
- ❖ **Second Place in the 2023 Law Propagation Contest “Gender Equality Through the Lens of Students” at the School of Law, National University of Vietnam, Hanoi**

December 2023

Award Recipient

Contributed to achieving second place in the contest by supporting the team in research and presentation preparation on legal issues related to gender equality, enhancing awareness and understanding among peers.

SKILLS

Programming & AI	Python, Machine Learning, Deep Learning, NLP, LLM Fine-tuning, Prompt Engineering, and RAG.
Frameworks & Libraries	PyTorch, Hugging Face, n8n and Dify.
Tools & Platforms	Git, Docker, Jupyter Notebook, Azure and AWS.
Evaluation & Data	Model evaluation, data analysis, experiment workflows, semantic search, and document QA

HONORS & AWARDS

BIDV Scholarship	2021
Toshiba Scholarship	2023
Outstanding Young Face of VJU	2023
Encouraging Studying Scholarship	2021 - 2025
10th Youth Global Leadership Program	2024

CERTIFICATIONS

IELTS - 6.5	2025
-------------	------
